

## INSP001 - INITIAL INSPECTION BIOBIKE

After 100-300 kilometers, screw connections have "set" it makes technical sense to perform a short maintenance. Here, the screw connections and spoke tension are checked and tightened if necessary. In addition, the circuit and various bearing clearances are checked. If things are found here that are unusual or faulty, we will contact you.

The NICOLAI BIKE must be packed in the NICOLAI BIKEBOX for pickup.  
Of course, you can also bring the BIKE to the company headquarters in Mehle and pick it up. For more information about the NICOLAI BIKEBOX please read the last section. The indicated prices are ONLY valid for national shipping.

Within the initial inspection the following activities are carried out by Nicolai GmbH i.A.:

- Checking of all screw connections including setting of the correct torque;
- SPRING: leakage test
- CONTROL BEARINGS: Inspection and adjustment
- DRIVE & SHIFT: Functional check and readjustment if necessary
- SADDLE & SADDLE POST: Check of all bolted connections; Functional check
- WHEELS & TYRES: Visual inspection for wear and damage; functional inspection of freewheel and bearings; re-centering of slight side impacts
- BRAKES: Functional check
- TESTDRIVE: Functional check of all components (e.g. lighting, brakes, gears, suspension)

The following activities or components are not included in the inspection and must be additionally exchanged and invoiced depending on necessity. If these things are necessary, we will inform you about the costs beforehand. It is then up to you to decide which activities will be performed:

- all wearing parts such as: Brake pads, tires, hoses, chains, belts, sprockets, brake fluid, etc.
- Components damaged by crash, overload or misuse such as: kinked lines or cables, damaged cables, bent handlebars, seat post, cranks, pedals, dented rims, scratches on suspension components, broken spokes.
- Labor times for removal of defective components and labor times for installation of new component .
- The maintenance recommended by the suspension manufacturer at certain times by the respective factory service of FOX or Rock Shox or EXT.
- The cleaning of dirty bikes
- E-bike : paid software upgrades

The following information is important for the processing of JOBRAD SERVICE INSPECTIONS:

An inspection of your bike is reasonable and necessary to keep your bike in good working order. Your job bike lease provides for 3 service inspections over the period of 36 months. You will receive a 70€ voucher per inspection from Jobrad, which we can redeem as a service provider at JOBRAD. Since our bikes are very elaborately and high quality manufactured and equipped, it makes sense in our eyes to perform a thorough inspection. The cost of a thorough inspection is not covered by the JOBRAD flat rate. We will charge you for any costs incurred by the inspection that exceed the flat rate. If you do not have a valid JOBRAD voucher, the total amount of the service will be the specified amount. With a JOBRAD voucher the gross amount is reduced by 70€.
